Summary

Software Engineering student with strong foundations in Java, Python, Data Structures, Algorithms, and Object-Oriented Programming. Experienced in building RESTful APIs and scalable web applications using Flask, MySQL, and modern frameworks. Passionate about cloud technologies, clean code, and software engineering best practices. Proven analytical and problem-solving skills through competitive programming and hands-on project development. Seeking Software Engineering roles where I can contribute to high-quality, maintainable systems.

Education

Vellore Institute of Technology - AP
B.Tech in CSE (Cyber Security), CGPA: 9.09
Narayana Junior College
Intermediate (MPC), 96.2%

Expected May 2027
Andhra Pradesh, India
March 2023
Nellore, Andhra Pradesh

Skills

Programming Languages Java, Python, SQL
Web Frameworks & Tools Flask, REST APIs, HTML, CSS, JavaScript
Databases MySQL, MongoDB
Development & DevOps Git, GitHub, VS Code, Linux
Core CS Data Structures, Algorithms, OOP, DBMS, OS, Networks
Testing & Security (basic) Nmap, Wireshark, SQLMap, BurpSuite

Internship Experience

Cyber Security & Ethical Hacking Intern

Feb 2025 – May 2025

Blackbuck Education

Hyderabad, India

- Performed security assessments and vulnerability testing, identifying and documenting software weaknesses – gained insight into secure coding practices.
- Collaborated with mentors to implement mitigation strategies such as input validation and parameterized queries, improving application resilience.
- Automated repetitive testing tasks using Python scripts, reducing manual effort by 30% and enhancing efficiency – applied software development skills to solve real problems.
- Developed a strong understanding of network protocols and web application architecture, complementing backend development knowledge.

Projects

Anti-Phishing Mail Detection System

- Built an end-to-end detection pipeline using Python and IMAP to fetch and classify emails for phishing indicators.
- Extracted URL structures, typo-squatting patterns, headers, and linguistic features for ML models.
- Developed an interactive dashboard (Flask + HTML/CSS) with REST API endpoints for real-time classification and monitoring.
- Achieved high detection accuracy through feature engineering and ensemble model tuning.

Vehicle Rental System

- Created a full-stack Flask application with MySQL to manage vehicle listings, bookings, and customer records.
- Designed RESTful APIs for booking workflows and real-time availability checks, reducing double-booking conflicts by 40%.
- Built a responsive frontend using HTML, CSS, and JavaScript for seamless cross-device experience.
- Integrated role-based access control for admins and customers, ensuring secure data handling.

SQL Injection Vulnerability Assessment

- Performed systematic testing on intentionally vulnerable web applications to identify and document security flaws.
- Developed remediation strategies (parameterized queries, input sanitisation) and validated their effectiveness.
- Produced a comprehensive technical report with reproducible steps, serving as a training resource for peers.
- Demonstrated strong analytical and problem-solving skills in dissecting vulnerabilities and proposing robust fixes.

Achievements

- Secured **3rd Rank** in CSE (Cyber Security) during the 9th University Day Celebrations.
- Achieved a **GeeksforGeeks Coding Score of 500+**, reflecting strong problem-solving and DSA skills.
- Participated in **Recon 2026 CTF & KOTH**, solving challenges in web security, cryptography, reverse engineering, and forensics – honed analytical and debugging abilities.

Certifications

Python Essentials 1 and 2 – Cisco Network Academy
Certified Cyber Security – ISC2.org
Cyber Security & Ethical Hacking Internship – Blackbuck Education (with VIT-AP)
Problem Solving (Basic) – HackerRank
